

Machino MB1 QD16 – 40mm, 50mm and 65mm fire

Machino MB1 QD16 fire squirts are essential equipment for firefighting systems on vessels and offshore facilities. Made of high strength bronze, they offer superior durability and corrosion resistance, ensuring reliable performance in demanding maritime environments.

COD EUROSUL: ---

IMPA: ---

Part Number: ---

Approvals:

Specifications

Benefits:

Durable construction: made from bronze, ensuring high resistance and longevity
 SOLAS/MED certification: compliant with international maritime safety regulations
 Three available models: 40mm, 50mm, and 65mm, suitable for different operations
 Effective firefighting performance: optimized for foam and water application

Applications:

Firefighting systems: essential for ships, offshore platforms, and industrial facilities
 Marine and offshore environments: ideal for emergency operations where durability and reliability are crucial
 Safety and compliance equipment: used by firefighters and emergency teams in naval settings
