

## Machino Sealing Rubber Ring – 40a, 50a and 65a

Machino Rubber Sealing Rings are essential components for ensuring efficient sealing in adapters used in firefighting systems. Made of high-resistance rubber, these rings are designed to withstand high pressures, ensuring reliable tightness in emergency operations.

**COD EUROSUL:** 091183

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

### Benefits

**High durability:** Designed to withstand high pressures in firefighting systems

**Easy installation:** Quick and secure fit on Machino adapters

**Efficient sealing:** Prevents leaks and maintains the integrity of the firefighting system

### Applications

**Firefighting systems:** Efficient sealing on hoses and Machino adapters

**Safety equipment:** Used by firefighters and safety professionals who demand quality and durability

**Industrial and marine environments:** Reliable sealing for high-pressure hydraulic connections

### Technical Specifications

Machino sealing rings are available in **40A (1.1/2")**, **50A (2")** and **65A (2.1/2")** sizes and are made from high-resistance rubber. They are compatible with Machino adapters, ensuring a secure and efficient fit for firefighting applications.
