

MB1 Storz Cap Cap buffer

The Storz Naval Cap is an essential component for securely sealing valves and hose connections in firefighting systems. Made of high-strength forged brass, it provides corrosion protection and withstands high working pressures. Equipped with a safety chain, this cap prevents accidental loss and ensures reliable sealing, avoiding leaks and contamination in the system. Available in 40A, 50A, and 65A models, it is compatible with various Storz couplings.

COD EUROSUL: 004296

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Benefits

Protection and sealing: Prevents leaks and entry of impurities into the system

High resistance: Forged brass construction, resistant to corrosion and high pressure

Safety chain: Prevents accidental loss during use

Universal compatibility: Models suitable for various hydrant and hose systems

Applications

Firefighting systems: Sealing hose and valve connections

Naval and offshore use: Safety equipment on ships and offshore platforms

Industrial and construction systems: Protection for hydraulic and pneumatic connections

Technical Specifications

Material: Forged brass

Connection Type: Storz

Corrosion Resistance: High

Working Pressure: Designed to withstand high pressures

Safety Chain: Yes
