

Nakajima coupling buffer – 40a, 50a and 65a

The Nakajima Coupling Cap is made of forged brass, ensuring high corrosion resistance and the ability to withstand high working pressures. Equipped with an integrated safety chain, it prevents loss and provides a reliable seal for Nakajima connections.

COD EUROSUL: 004135

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Benefits

Robust construction: Forged brass for greater durability

Corrosion resistance: Ideal for marine and industrial environments

Safety chain: Prevents cap loss during use

Efficient sealing: Ensures secure closure for Nakajima connections

Applications

Firefighting systems: Used on ships, offshore platforms, and in industrial facilities

Industrial systems: Secure closure for hydraulic and pneumatic connections

Marine environments: High resistance to corrosive agents for naval applications

Technical Specifications

The Nakajima cap is available in sizes 40A (1.1/2”), 50A (2”), and 65A (2.1/2”). It has a length of 35mm (for 40A and 50A) and 40mm (for 65A), with opening sizes (KA) of 60mm, 73mm, and 90mm respectively

Material: Forged brass

Safety chain: Yes
