**IMPA:** ---

**Part Number:** 371013

**Approvals:** ---

## Specifications

### Applications

Distance measurement: precise tool for measuring distances on nautical charts

Position plotting: assists in determining estimated position and drawing LOPs

Safe navigation: essential for calculating the range of lighthouses and other navigation aids

### Benefits

accuracy: ensures reliable and exact measurements, essential for navigation

versatility: can be used for various nautical functions such as position plotting and distance measuring

robustness: durable and resistant construction suitable for continuous use in marine environments
