

P15D 24V 60W SUPPTAINAL LAMP FOR ALDIS SIGN

Product Description: P15D type spare lamp with 24V and 60W specification, designed for use in Aldis signaling lanterns, widely used in visual communication by the way in naval and offshore environments. It offers reliable performance, clear visibility and perfect compatibility with Aldis equipment.

COD EUROSUL: 003040

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Material: High-resistance glass with metal base

Fixers: P15D-type base with standard fitting

Design: Mirrored globe for concentrated light focus, ideal for optical signaling

Dimensions: Compatible with standard Aldis systems (specific dimensions not provided)

Applications

Aldis lanterns for Morse signaling

Visual communication on vessels

Nautical and offshore signaling systems

Benefits

Readiness: Allows quick and efficient field replacement

Durability: Robust construction designed to withstand harsh maritime environments

Safety: Ensures signal clarity, essential for safe communication at sea

An essential component for maintaining the operability of Aldis systems, in compliance with international maritime signaling standards

Technical Specifications

Material: Tempered glass and metal base

Fixers: P15D fitting
