

Echo Sounder Recording Paper 204mm x 20m for Furuno FE- 881/8

Special thermal paper designed for continuous graphic depth recording in echo sounders, compatible with Furuno FE-881 and FE-8 models. Made from high-quality heat-sensitive material, it ensures accurate, ink-free printouts. The fan-fold format simplifies handling and installation, making it ideal for marine navigation and offshore operations.

COD EUROSUL:	000527
IMPA:	372623
Part Number:	PD-2020NW
Approvals:	---

Specifications

Features

- Type:** Thermal echo sounder paper
- Compatibility:** Furuno FE-881 / FE-8
- Format:** Fan-Fold (accordion-style folded)
- Material:** High-resolution thermal paper
- Dimensions:** 204 mm (width) x 20 m (length)
- Manufacturer Code:** PD-2020NW

Applications

- Continuous depth data recording
- Sonar-based marine navigation systems
- Offshore surveying and monitoring

Benefits

- Precision:** Ink-free accurate printouts
- Practicality:** Easy replacement and handling
- Durability:** Long-lasting image under marine conditions

Integration: Optimized for Furuno models

Package Includes

01 thermal fan-fold paper unit (204 mm x 20 m)
