

Oil Absorbent Pillow 23 x 23 x 5 cm – Box with 50 Units

The pillow pillow for oil and 23x5cm derivatives is a product designed to contain and absorb large volumes of hydrocarbons in localized areas.

Produced with 100% hydrophobic polypropylene, this pillow is effective in the selective absorption of oils and fuels, fully repelling water. Ideal for use in confined areas, under leaks, ships, tanks and industrial areas where there is a risk of flammable fluid accumulation.

COD EUROSUL: 096159

IMPA: 232517

Part Number: ---

Approvals: ---

Specifications

Features:

Material: 100% polypropylene, hydrophobic

Fixers: Not applicable

Design: Pillow format for localized and punctual absorption

Dimensions: 23 cm x 23 cm x 5 cm

Technical Standard (Line Referential): ASTM F726-17

Applications:

Used to contain and absorb oil leaks in difficult places, under valves, equipment, containers, pumps, or in sea and industrial environments where spill control needs to be accurate and concentrated.

Benefits:

Readiness: immediate application in critical places

Durability: High retention capacity without rupture of the structure

Security: Avoid spreading flammable oils, contributing to the prevention of environmental and operational accidents

Complements emergency response systems and environmental maintenance routines in port, naval

and offshore environments.

Technical Specifications:

Material: 100% hydrophobic polypropylene

Fixers: Not applicable

Dimensions: 23 cm x 23 cm x 5 cm

Standard: ASTM F726-17 (adsorbent line)

Packaging: box with 50 units
