

Lalzas Tubular Radar Reflector for Sailboats and Dinghies

The Lalzas tubular radar reflector is an essential device for enhancing your boat's visibility under challenging conditions. This unit reflects radar signals from nearby vessels, making your boat appear larger on their radar screens, thus improving safety in low visibility situations or areas with heavy maritime traffic.

COD EUROSUL:	094372
IMPA:	---
Part Number:	23-001-502A
Approvals:	---

Specifications

Features

Material: Corrosion-resistant aluminum

Fasteners: Includes mounting accessories for masts and other surfaces

Design: Tubular, optimized for maximum reflectivity

Dimensions: Length 58 cm, diameter 5 cm

Applications

Ideal for sailboats, dinghies, and small vessels

Use in navigation areas with low visibility

Benefits

Readiness: Increases visibility on other vessels' radars

Durability: Resistant to harsh marine environments

Safety: Reduces the risk of collisions in low-visibility conditions

This radar reflector is essential for those seeking safety and reliability during navigation, especially in foggy conditions or heavy maritime traffic.
