

## ACR Pathfinder™ PRO Search and Rescue Radar Transponder

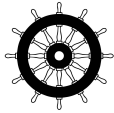

The ACR Pathfinder™ PRO Search and Rescue Radar Transponder (SART) is a critical device for maritime safety operations. Certified according to IMO SOLAS regulations, the Pathfinder™ PRO ensures quick localization of vessels in distress via radar signals. Equipped with a high-capacity lithium battery, it provides over 96 hours of standby time or up to 12 hours of continuous operation during emergencies. A wall mount is included for secure and accessible storage.

**COD EUROSUL:** 002188

**IMPA:** ---

**Part Number:** 82615

**Approvals:**

**SOLAS**

## Specifications

### Features

**Material:** High-strength plastic

**Mounting:** Wall bracket included

**Design:** Compact, easy to handle, and quick to activate

**Dimensions:** Not specified

### Applications

**Commercial vessels:** As required by GMDSS

**Vessels with more than one liferaft**

**Search and rescue operations:** At sea

### Benefits

**Readiness:** Always ready for immediate use in emergencies

**Durability:** Long-lasting lithium battery for extended operations

**Safety:** Meets maritime safety standards, enabling quick vessel location

With the ACR Pathfinder™ PRO, you are prepared to face the most challenging conditions, ensuring compliance with international maritime safety standards.
