

Rechargeable Battery for Solo 461 and 460 Kit

The Solo 770-001 rechargeable battery is a high-performance component, designed for use with the Solo 461 and 460 test kits, as well as other products from the Solo and Testifire range. With a 3Ah capacity, it provides reliable and efficient power, making it ideal for fire detection system maintenance.

COD EUROSUL: 090050

IMPA: ---

Part Number: 770-001

Approvals: ---

Specifications

Features

Material: Rechargeable lithium-ion component

Capacity: 3Ah

Design: Rod-shaped, lightweight and ergonomic

Compatibility: Solo 461 and 460 kits, plus Testifire product line

Applications

Preventive maintenance and alarm testing in fire detection systems

Use in industrial, commercial and maritime environments for inspection and alarm certification

Benefits

Readiness: Ensures continuous power for wireless test equipment

Durability: Long service life with optimized recharge cycles

Efficiency: Easy transport and handling, providing greater operational agility

Technical Specifications

Material: Lithium-ion

Capacity: 3Ah

Compatibility: Solo 461, 460 kits and Testifire product line
