

Rechargeable ICOM BP-224 Battery for IC-GM1600 GMDSS Radio

The rechargeable ICOM BP-224 battery is designed to provide reliable and long-lasting power for the IC-GM1600 marine radio. Using Nickel-Cadmium (NiCd) technology, this battery delivers exceptional performance in extreme environments, making it ideal for maritime and rescue operations. Certified under UN 3480 and manufactured to international safety standards, the BP-224 is a safe and efficient choice for maritime professionals.

COD EUROSUL: 004070

IMPA: ---

Part Number: BP-224

Approvals: ---

Specifications

Features

Material: Nickel-Cadmium (NiCd), robust and resistant composition

Capacity: 7.2V / 1500mAh

Compatibility: Exclusive for IC-GM1600 radios

Design: Compact sealed plastic body, resistant to impacts and vibrations

Applications

Power supply for IC-GM1600 marine radios for emergency operations and offshore communication

Benefits

Efficiency: Provides reliable power for extended operations

Durability: Resistant to adverse weather conditions

Safety: UN 3480 certified, designed to prevent leaks or explosions in normal use

Technical Specifications

Material: Nickel-Cadmium (NiCd)

Capacity: 7.2V / 1500mAh

Certifications: UN 3480, Risk Class 9

Dimensions: Cylindrical cells with nickel-plated steel casing
