

Rechargeable NiMH 850mAh Battery for McMurdo R2 VHF Radio

Nickel-Metal Hydride (NiMH) battery designed for the McMurdo R2 VHF radio, ideal for maritime survival communication equipment. This pack features six sealed rechargeable cells, offering short-circuit protection and a waterproof design for reliable and safe use.

COD EUROSUL: 002931

IMPA: ---

Part Number: 84-211

Approvals: ---

Specifications

Features

Material: Nickel-Metal Hydride (NiMH)

Fasteners: Sealed unit, no user-serviceable parts

Design: Compact, water-resistant and short-circuit protected

Dimensions: Not specified

Applications

Communication equipment in survival craft

Use in demanding maritime environments

Benefits

Readiness: Guaranteed reliable operation in critical situations

Durability: Sealed rechargeable cells for extended longevity

Safety: Compliance with maritime standards and short-circuit protection

Technical Specifications

Material: Nickel, nickel hydroxide, cobalt hydroxide, potassium hydroxide and polyamide
