## Specifications

### Features

**Material:** Sealed body resistant to saltwater and UV radiation

**Fixers:** Connector with polarized plug and threaded locking ring

**Design:** Compact, lightweight, with constant white LED light

**Activation:** Automatic via activation pin coupled to the lifeboat

**Autonomy:** ≥ 12 hours of continuous operation

**Installation:** Internal, with customizable cable length according to application

### Applications

Internal lighting of motorized lifeboats

Mandatory lifesaving equipment on SOLAS-certified vessels

Offshore and commercial environments requiring international compliance

### Benefits

**Readiness:** Automatic activation at the moment of lifeboat inflation

**Durability:** Certified to withstand fire, vibration, moisture, extreme temperatures, and impacts

**Safety:** Stable illumination for reading and orientation inside the lifeboat during emergencies

### Technical Specifications

**Model:** Rescue Master 1B

**Light Type:** Continuous (steady light)

**Activation:** Automatic via inflation pin

**Power Supply:** Integrated sealed battery

**Autonomy:** ≥ 12 hours

**Operating Temperature:** -52°C to +65°C (Polar Code compliant)

**Certifications:** MEDB000061F, SOLAS, IMO MSC.1/Circ.1628, EN 60945, ISO 24408
