

RHF -I Chemical Protection Clothing CCS Certificate

RHF-I chemical protection clothing, airtight, is a security PPE designed to protect firefighters and naval professionals against aggressive chemicals, acids, alkalis and toxic vapors. Produced with flame -straight blushing tissue, it is resistant to traction, drilling and aging. Its fully prohibited structure prevents contaminant air, gases or liquids, ensuring maximum protection in areas with risk of critical exposure. The design has hood, boots and integrated gloves, providing full body coverage and continuous insulation. **IMPORTANT:** Hermetically sealed product - does not allow air entry or external vapors.

COD EUROSUL: 092030

IMPA: 330965 – Chemical
Protective Suit, Type 1,
Gastight

Part Number: RHF-I-L

Approvals:

Specifications

Material: Flame-retardant PVC rubber with chemical barrier

Fasteners: Front sealed zipper with sealing flap and metal snap closures

Design: One-piece suit with hood, panoramic visor, integrated boots and gloves

Sealing: Hermetic structure – 100% sealed against air, gases, and liquids

Applications:

Emergency response to chemical products and toxic vapors

Interventions with risk of exposure to corrosive gases
Use in industrial, maritime, and port environments

Benefits:

Readiness: Easy to wear, with quick sealing system and integrated structure

Durability: High mechanical resistance, ideal for repeated use in harsh environments

Safety: CCS (China Classification Society) certification and fully sealed structure

– total protection against infiltration of gases, liquids, and chemical dust

Essential product for critical interventions, in compliance with international chemical and maritime safety standards.

Technical Specifications:

Material: Flame-retardant chemical PVC

Fasteners: Sealed zipper with snap closure

Sealing: Hermetic structure – total sealing against air entry

Footwear: Size 44

Certification: Solas CCS
