

## RL5 Outdoor Lamp for Inflatable Balsa – Daniamant (Automatic)

RL5 is an automatic external signaling lamp developed for inflatable raft ferries, meeting the requirements of the Solas Convention. With high performance LED technology, the RL5 model provides reliably and continuous intermittent lighting after ferry activation. Product approved by MED (DNV) and USCG certifications, ensuring safety and compliance with emergency maritime operations.

**COD EUROSUL:** 005100

**IMPA:** ---

**Part Number:** ---

### Approvals:

## Specifications

### Features:

Material: sealed plastic body, salt water resistant, corrosion and solar radiation

Fixers: Mounting System integrated with the ferry equipment

Design: Compact, with translucent lens and optimized internal circuit for LED

Technology: Lighting with 8 high -gloss LEDs

Activation: automatic when inflating the life ferry

Autonomy:  $\geq 12$  continuous hours

Cable length: Not specified (individual model)

### Applications:

External signaling lighting on inflatable rafts

Mandatory equipment on commercial and offshore vessels

Vessel abandonment operations according to international regulations

**Benefits:**

Readiness: immediate and automatic activation with ferry inflation

Durability: impact resistant, fire, oil, water and extreme conditions

Safety: International certification solas/med and guaranteed visibility in critical situations

**Technical Specifications:**

Model: RL5

Light type: intermittent with LED (automatic)

Autonomy:  $\geq 12$  hours

Certifications: MEDB0000618, Solas, MSC.1/Circ.1628, USCG

Life: As specified by the manufacturer
