

Role for **COURSE RECORDER** coil 140mm x 16m

Technical paper coil for course registers used in maritime navigation systems. With 140mm wide and 16 meters long, this model is suitable for continuous graphics records on onboard equipment. Made with sturdy material, ensuring durability and sharpness in printing even under severe operating conditions.

COD EUROSUL: 000147

IMPA: 372607

Part Number: ---

Approvals: ---

Specifications

Features

Material: Technical paper for continuous printing

Mounting: Not applicable (roll system)

Design: Roll format with central core for recorder fitting

Dimensions: 140 mm wide x 16 m long

Applications

Marine course recorders

Navigation data collection systems

Onboard graphic equipment

Benefits

readiness: ready for immediate use in compatible systems

durability: high-strength paper for continuous use in marine environments

safety: ensures reliable records, essential for audits and regulatory compliance

indispensable product to maintain accurate route history in professional navigation

Technical Specifications

Material: Continuous technical paper

Mounting: Not applicable (direct installation on equipment shaft)

Dimensions: 140 mm x 16 m
