

## SCBA Face Mask with Head Harness

The SCBA Face Mask is designed for use with positive pressure demand valves in self-contained breathing apparatus (SCBA) systems. This mask provides a secure and comfortable seal, ensuring respiratory protection in hazardous environments. Made from butyl rubber with a silicone head harness, it is ideal for situations where there is a risk of exposure to smoke, poisonous gases, vapors, or oxygen deficiency. This universal fit mask is MED certified and engineered to offer maximum protection and comfort in various critical conditions.

## Specifications

### Features

**Color:** Black.

**Size:** Universal fit.

**Approval:** MED.

**Brand:** Fangzhan.

**Note:** Without demand valve.

### Applications

Chemical industry, protecting against exposure to poisonous gases and vapors.

Naval operations, essential for use in emergency situations on ships and vessels.

Mining, ensuring respiratory safety in underground environments with low oxygen levels.

Firefighting, providing respiratory protection in locations with high smoke concentration.

### Technical Specifications

**Material:** Butyl rubber with silicone head harness.

**Color:** Black.

**Size:** Universal fit.

**Approval:** MED.

**Brand:** Fangzhan.

**Note:** Without demand valve.
