

SCBA RHZK Spare Valve HZGQF-I for Mask

The HZGQF-I Spare Valve for the SCBA RHZK is an essential component for self-contained breathing apparatuses, designed to ensure a safe and controlled air supply in emergency situations and hostile environments. Compatible with the SCBA RHZK mask, this valve provides reliable performance, making it ideal for firefighting operations, chemical industries, naval settings, and mining. The HZGQF-I valve is robust and easily integrates with the system, offering security and control for users in challenging conditions.

COD EUROSUL: 003661

IMPA: ---

Part Number: HZGQF-I

Approvals: ---

Specifications

Features:

Compatibility: designed for SCBA RHZK systems with precise mask fitting

Function: regulates airflow between the cylinder and respirator for stable supply

Construction: made of high-strength materials for harsh environments

Safety: ensures reliable and consistent airflow during emergencies

Benefits:

Reliability: provides safe air control in critical situations

Durability: built to withstand heavy use and extreme conditions

Efficiency: easy maintenance and consistent performance

Technical Specifications:

Compatibility: SCBA RHZK

Component type: replacement valve

Material: high-durability metal alloy

Application: direct connection to RHZK SCBA mask
