

## SL-400-Daniamant (replaces MF1127)

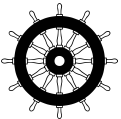

The SL-400 is an external signaling lamp for life boats, approved according to the requirements of the Solas Convention and approved by the DNV with med/USCG certification. Replaces the MF1127 model and is designed for use on motorized survival vessels. The equipment operates between 10 and 30VDC, with manual drive, providing high light intensity in emergency operations.

**Approvals:**

## Specifications

### Features

**Material:** Durable plastic body with translucent hemispheric lens

**Fixers:** Base with pre-drilled holes for direct installation on the lifeboat

**Design:** Compact, robust, and highly visible in all directions

**Power Supply:** 10–30VDC (direct connection to the vessel's electrical system)

**Power Cable:** 40 meters

**Operation Mode:** Manual flashing light

### Applications

External installation on motorized lifeboats

Location lighting and emergency signaling in compliance with SOLAS III/35 and III/36

Certified maritime lifesaving equipment for commercial vessels

**Benefits**

**Readiness:** Simple and quick manual activation in abandonment situations

**Durability:** Resistant to solar radiation, vibration, weather, and fire testing

**Safety:** International DNV certification and compliance with MED/1.2a, ensuring visibility and reliability

**Technical Specifications**

**Model:** SL-400

**Operating Voltage:** 10–30VDC

**Light Type:** Manual intermittent flashing

**Electrical Connection:** Terminal block with 40-meter cable

**Certifications:** SOLAS, MED (MEDB000061J), USCG, MSC.1/Circ.1628

**Estimated Service Life:** As marked by the manufacturer (expiration date printed on product)
