

SL-500 internal lamp for life boat-10-30V DC with 4m cable

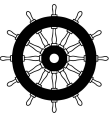

The Daniamant SL-500 lamp is a continuous internal light developed specifically for motorized life boats. Designed with high efficiency LED technology, it operates at an interval of 10 to 30V DC and offers constant lighting with a minimum duration of 12 hours. It has a 4 meter long cable, facilitating its installation. Its resistant ABS construction ensures high durability even in the most severe maritime conditions. Certified according to international standards and approved by DNV, SL-500 is essential for safety in rescue operations, ensuring reliable and permanent internal visibility inside salvage vessels.

COD EUROSUL: 091900

IMPA: ---

Part Number: 24-501A

Approvals:

Specifications

Characteristics

Material: High-resistance ABS

Fixers: Flat surface installation with stainless steel screws

Design: Compact, lightweight, water-resistant, and vibration-resistant

Light Type: Continuous (LED)

Luminous Intensity: Minimum 0.5 cd – average 5.3 cd

Duration: ≥ 12 hours

Operating Voltage:

10-30V DC

Weight: 294 g

Cable Length: 4 meters

Operating Temperature: -52°C to +65°C

Certifications: SOLAS, MED, DNV

Applications

Ideal for use in motorized lifeboats and other rescue vessels, providing reliable and continuous internal lighting during maritime emergencies

Benefits

Readiness: Powered directly from the vessel's electrical system for immediate activation

Durability: ABS body with high thermal and mechanical resistance

Safety: Continuous high-visibility LED lighting in compliance with international standards

Essential equipment for survival craft, enhancing occupant safety and meeting international maritime regulations

Technical Specifications

Material: High-durability yellow ABS

Power Source: 10-30V DC

Light Type: Continuous

Intensity: ≥ 0.5 cd (average 5.3 cd)

Autonomy: ≥ 12 hours

Cable Length: 4 meters

Weight: 294 g

Operating Temperature: -52°C to +65°C

Certifications: SOLAS, MED, DNV
