

## Smoke Detector Test Kit up to 8.2 Metres Solo 812

The Solo 812 Kit is a complete solution for functional testing of smoke detectors installed up to 8.2 meters high. It combines the Solo 330 smoke dispenser with fiberglass telescopic poles and a universal removal tool, ensuring safe and efficient testing without ladders. The Solo A10 aerosol provides clean, reliable smoke generation, ideal for professional inspections, preventive maintenance, and fire detection system certification. A protective Solo 604 bag is included for easy storage and transport.
