

Smoke/heat detector test kit with 2.5 meters range Testifire- XTR2-024

The Testifire-XTR2-024 smoke and heat detector test kit is the ideal solution for fast and accurate testing of smoke and heat detectors. This kit replaces the TF1001-1-001 and includes the Testifire XTR2 smoke generator, which automatically generates test reports and features a cleaning mode that eliminates repeated alarms, ensuring precise results. With the high-temperature setting, this kit is perfect for testing heat detectors set to 100°C. The wireless design and automatic LED flashlight make testing easier in dark or hard-to-reach areas.

COD EUROSUL: 096743

Specifications

Benefits:

Readiness: Fast, automatic tests with report generation

Safety: Cleaning mode to prevent repeated alarms

Versatility: Ideal for testing heat detectors set to 100°C

Mobility: Wireless design and LED flashlight for dark or hard-to-reach areas

Technical specifications:

Model: Testifire-XTR2-024

Application type: Smoke and heat detector testing

Range: Up to 2.5 meters

Technology: Wireless testing with automatic report generation

Testing temperature: Up to 100°C for heat detectors

Cleaning mode: Eliminates repeated alarms

Flashlight: Automatic LED for testing in dark areas

Replacement for: TF1001-1-001

Certification: Complies with international fire detection system testing standards
