

Smoke Test Capsules for Solo365 – 6-Pack

These smoke test capsules are designed exclusively for use with the Solo365 electronic smoke detector tester, providing clean, controlled, on-demand smoke generation. Activation takes place electronically inside the device, ensuring accurate testing without the use of pressurized aerosol sprays. The 6-pack offers excellent performance for professional inspection routines, preventive maintenance and functional testing of smoke detectors in industrial, commercial, marine and building environments. Each capsule delivers multiple activations with consistent safety and reliability.

Specifications

Features:

Compatibility: Solo365 only

Technology: on-demand smoke generation

Operation: clean use, no pressurized aerosol

Quantity: pack with 6 capsules

Output: multiple activations per capsule

Benefits:

Accuracy: fast, stable and controlled testing

Safety: avoids contamination and reduces risk of damage to detectors

Efficiency: high yield per capsule in maintenance routines

Convenience: easy to store, transport and replace

Professional use: suitable for certified inspections and periodic testing

Technical Specifications:

Product: smoke test capsules for Solo365

Application: functional testing of smoke detectors

Quantity per pack: 6 capsules

Smoke generation: clean, non-pressurized technology

Activations per capsule: multiple (depending on use and test duration)
