

Sobresatelling lamp P15D-30 12V 60W P/ Lantern Aldis- Morse RPC Signal

P15D-30 Preresalent Halogen Lamp with 60W power and 12V voltage, especially suitable for Aldis Lanterns used in Morse RPC signaling systems. Ensures high performance in maritime applications, with precise and reliable lighting. Ideal for fast field substitutions, maintaining equipment efficiency according to solas requirements.

COD EUROSUL: 003056

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Material: Reinforced glass bulb with metal base P15D-30

Fixers: P15D bayonet base

Design: Integrated mirrored reflector with high-intensity focus and centralized filament

Power: 60W

Voltage: 12V

Estimated Service Life: ~100 hours

Applications

Replacement lamp for Aldis Morse signaling lanterns, model RPC

Maritime visual communication systems

Use on commercial and offshore vessels in compliance with SOLAS safety standards

Benefits

Readiness: Easy and quick installation with standard fitting

Durability: Resistant to vibration and thermal variations in harsh environments

Safety: Exact compatibility with Aldis lantern sockets, preventing contact failures

An essential spare part to ensure continuous and safe operation of visual signaling systems
