

Solo 200 Detector Removal Tool – Without Pole

Solo 200 is a specialized tool for safe and efficient removal of smoke detectors, ideal for cleaning, replacement and maintenance. Allows you to do the work without the need for stairs or scaffolding, reducing operational costs and risks. It has a rotary head with color -encoded fittings, adjustable for different detecting sizes and shapes. Universal design ensures compatibility with most detectors available on the market, facilitating handling at various angles. Made with high strength materials, the 200 solo has a lifetime warranty, being a durable and secure investment for maintenance teams.
