

Solo 613 Smart Backpack with 6.3 m Extension Pole Kit

The Solo 613 is a complete backpack and pole kit designed to support technicians working on detectors installed at height. It includes the Solo 611 compartmentalized backpack, one Solo 110 telescopic pole and three Solo 111 extension poles, providing a total reach of up to 6.3 meters. It is ideal for maintenance and inspection teams that require mobility, organization and safety in industrial, commercial and offshore environments.
