

## Solo 809 Smoke Testing Kit – 6.0 Meter Reach

The 809 solo is a complete kit for smoke detectors, heat and carbon monoxide (CO), allowing safe and accurate checks at heights of up to 6.0 meters. Designed to facilitate the maintenance of fire detection systems, the kit is ideal for commercial, industrial and residential applications, ensuring compliance with safety standards.

**COD EUROSUL:** 005384

**IMPA:** 331073

**Part Number:** ---

**Approvals:** ---

## Specifications

### Kit Composition:

- Solo 851:** Multifunctional device for smoke, heat, and CO testing
- Solo 330:** Support for applying test aerosol directly to the detector
- Solo 100:** Adjustable telescopic pole with reach up to 6.0 meters
- Solo 101:** Additional telescopic poles for greater testing flexibility
- Solo 200:** Smoke detector remover for maintenance and replacement
- Solo 610:** Durable case for safe transport and equipment organization

### Benefits:

- Complete Testing:** Performs smoke, heat, and CO tests with precision
- Extended Reach:** Telescopic pole eliminates the need for ladders in high locations
- Ease of Use:** Tools designed for quick and safe maintenance
- Secure Transport:** Solo 610 case keeps the kit protected and organized

### Applications:

- Fire Detection System Maintenance:** Essential for technicians conducting regular inspections
- Commercial and Industrial Environments:** Ideal for large buildings
- Preventive Safety:** Ensures compliance with regulations and prevents failures in emergencies

**Specifications:****Model:** SOLO 809**Reach:** Up to 6.0 meters**Components:** Solo 851, Solo 330, Solo 100, Solo 101, Solo 200, Solo 610**Use:** Smoke, heat, and CO detector testing
