

Solo 810 Smoke Detector – 2.5m Initial Test Kit

The 810 solo is a complete initial kit for smoke detector tests installed at ceiling standard heights. Composed of a 330 solo dispenser, a 101 solo telescopic post and an A10 solo test aerosol, the kit allows safe and effective checks.

Accompanies a 604 solo bag for transportation and practical storage.

COD EUROSUL: 000008

IMPA: 331073

Part Number: Solo 810

Approvals: ---

Specifications

Kit Composition:

Solo 330: Support for precise application of test spray to the detector

Solo A10-024: 142 ml non-flammable aerosol for safe smoke particle simulation

Solo 101: Fiberglass telescopic pole with 1.20 m reach

Solo 604: Durable bag for safe transport of the kit

Benefits:

Complete Kit: Includes all tools for safe and efficient testing

Easy Transport: Solo 604 bag ensures protection and mobility

Safe Operation: Non-flammable Solo A10 spray guarantees risk-free testing

Extended Reach: Solo 101 pole enables standard-height testing without ladders

Applications:

Detector Maintenance: Ideal for technicians conducting regular checks

Commercial and Residential Buildings: Suitable for testing detectors in standard ceiling heights

Preventive Safety: Essential to ensure proper smoke detector functionality

Specifications:

Model: Solo 810

Pole Length: 1.20 m (Solo 101)

Support Diameter: 10.5 cm (Solo 330)

Spray Capacity: 142 ml (Solo A10)

Bag Dimensions: 18 x 18 x 146 cm (Solo 604)
