

Solo 900 Smoke Detector Test Kit

The Solo 900 kit is a complete solution for testing smoke detectors up to 9.3 meters. It includes the Solo 365 tester, Solo 100 and Solo 101 telescopic poles, Solo 200 removal tool, and Solo 610 transport bag, allowing for fast, safe, and efficient testing. Ideal for industrial, commercial, and marine environments, this kit uses clean technology with no pressurized aerosols, ensuring precise tests without damaging the detectors. The Solo 770 battery provides long autonomy, and the Solo 727 charger allows for continuous field operation.

COD EUROSUL: 092121

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Reach: up to 9.3 meters

Components: Solo 365, Solo 100, 3x Solo 101, Solo 200, Solo 610

Application: smoke detector testing

Transport: Solo 610 carrying bag

Operation: wireless

Benefits:

Readiness: fast and safe testing

Efficiency: eliminates pressurized aerosols

Safety: clean technology with no residue

Autonomy: long-lasting battery life

Versatility: one kit for different test types

Technical Specifications:

Model: Solo 900

Tester: Solo 365

Poles: Solo 100 and 3x Solo 101

Tool: Solo 200

Bag: Solo 610

Reach: 9.3 meters
