

Solo A10 Smoke Detector Test Aerosol 4.8 oz/142 ml – Box of 5 Units

Solo A10 is a non-flammable test gas designed to simulate smoke for functional testing of smoke detectors. **Box of 5 units**—ideal for maintenance teams performing multiple tests. Compatible with manual use or Solo dispensers (e.g., 330/332).

Leaves no residue, does not damage sensors, and suits industrial, commercial, marine, and offshore environments.

Part Number: ---

Approvals: ---

Specifications

Features:

Type: Non-flammable test gas

Application: Smoke simulation for smoke detector testing

Certification: UL certified and manufacturer-approved

Format: 4.8 oz/142 ml aerosol – box of 5 units

Use: Manual or dispenser use; practical, direct application

Benefits:

Readiness: Enables quick and regular detector testing

Durability: High yield per can for multiple checks

Safety: Clean, non-flammable formula

Efficiency: Uniform spray for consistent results

Technical Specifications:

Material: Non-flammable test gas

Compatibility: Smoke detectors; manual use or Solo dispenser

Fixings: Directional aerosol spray (or via dispenser)

Certification: UL

Contents: Box of 5 units (Solo A10 cans)
