

Solo A10 Smoke Detector Tester Aerosol Spray – 142ml

A10 soil is an aerosol designed to test smoke detectors safely and effectively. With 142ml of capacity, this non-flammable spray replaces the A3 and A4 soil models and is suitable for all types of detectors installed in buildings. When releasing synthetic smoke particles, it safely simulates the conditions of a real fire, ideal for testing and preventive maintenance.

COD EUROSUL: 001002

IMPA: 331075

Part Number: ---

Approvals: ---

Specifications

Features

Composition: Alcohol blend (80-99%) free of HFC 134a (1,1,1,2-tetrafluoroethane)

Vapor Density: 5.26 kg/m³

Water Solubility (25°C): 0.15%

Melting Point: -101°C

Boiling Point: -26.5°C

Flash Point: Non-flammable

Vapor Pressure (20°C): 70 psi

Applications

Security system maintenance: Regular testing of commercial and residential smoke detectors

Smoke detector testing: Daily use to ensure proper operation

Replacement for discontinued products: Safer alternative to Solo A3 and A4

Benefits

Safe testing: Releases smoke particles without damaging the detector or environment

Non-flammable: Ensures greater safety across various applications

Effective substitute: Maintains efficiency without harmful gases

Compatibility: Works with Solo 330, Aero 300, and Smoke Sabre dispensers

Sustainability: HFC 134a-free, compliant with global environmental standards
