

Solo C6 CO Detector Test Aerosol (Solo C3 Replacement)

C6 soil aerosol is a non-flammable test gas designed to verify the functioning of carbon monoxide detectors (CI). Used to simulate the presence of CO, ensures rapid and safe tests, approved by manufacturers of detectors and international certifying bodies.

COD EUROSUL: 091252

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Gas type: Genuine and non-flammable

Usage: Easy manual operation

Approval: Recognized by detector manufacturers

Function: Enables quick detector testing and reset

Certification: UL

Applications

Testing carbon monoxide (CO) detectors on vessels and offshore facilities

Inspection of safety systems against toxic gases

Maintenance of CO alarms in industrial and commercial environments
