

Stainless Steel 304 Lifebuoy Holder 70cm – ‘Y’ Type

The Life Buoy Holder 70cm is an essential accessory for securely fastening life buoys on vessels, offshore platforms, and industrial environments. Made of stainless steel, it offers high corrosion resistance and durability under harsh marine conditions. Its Y-shaped design ensures a firm fit, allowing quick and easy access to the life buoy during emergencies.

COD EUROSUL: 090913

IMPA: ---

Part Number: ---

Approvals:

Specifications

Features:

Material: Stainless steel 304

Fixings: Not specified

Design: Y-shaped robust structure designed to withstand impact and maintain stability

Dimensions: Compatible with 70cm diameter life buoys

Applications:

Commercial and recreational vessels

Offshore platforms and ports

Industrial and maritime areas

Facilities requiring compliance with safety regulations

Benefits:

Readiness: Allows immediate access to the life buoy in emergency situations

Durability: Built with resistant materials for extended use in harsh environments

Safety: Secure structure ensures proper storage and retrieval of life-saving equipment

The Life Buoy Holder 70cm is a critical component for onboard safety.

Technical Specifications:

Material: Stainless steel

Fixings: Not specified

Dimensions: Compatible with 70cm life buoys
