Specifications

Features

Material: High corrosion-resistant stainless steel.

Durability: Ideal for long-term use in harsh environments.

Design: Robust, safe, and functional structure.

Applications: Marine, industrial, lifting, and anchoring environments.

Applications

Anchoring and mooring operations in naval settings.

Industrial activities requiring reinforced equipment.

Corrosive and demanding environments where safety is a priority.

Benefits

High reliability, reducing failures and increasing operational safety.

Versatile use, suitable for multiple maritime and industrial purposes.

Excellent cost-benefit, with long service life and low maintenance costs.

Package Contents

01 stainless steel pelican hook.

Technical Specifications

Material: Corrosion-resistant stainless steel.

Weight: 5 kg.

Dimensions: 40 cm (L) x 15 cm (W) x 8 cm (H).

Certifications: ISO 9001.
