

Hydraulic Protection Net AISI 316 Eurosafe – High-Strength Net for Lights, CCTV, Speakers, Radios, Floodlights and Height-Mounted Equipment

The Eurosafe safety nets made of AISI 316 stainless steel are designed to meet the highest industrial and marine safety standards. They prevent the fall of height-mounted equipment such as lights, floodlights, speakers, CCTVs, strobe lights, radios, and other critical systems. Supplied in various models and dimensions to accommodate different geometries and volumes.

COD EUROSUL: 096794

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Material: AISI 316 stainless steel (marine and UV corrosion resistant)

Mesh: Braided, flexible, and tight-fitting

Certification: SGS tensile test – breaking load of 23.42 kN (2388.17 kgf)

Working Load Limit (WLL): 2.5 kN

Safety Factor: Exceeds 8x the WLL

Service Life: Up to 25 years under normal conditions

Fixation: Adjustable kit in stainless or galvanized steel

Applications:

Light fixtures

Floodlights and reflectors

CCTV cameras

Speakers

Strobe lights and radios
Other suspended equipment

Benefits:

Certified safety: Tested and compliant with international standards

Superior durability: Designed for offshore and harsh environments

Versatility: Adaptable to different equipment sizes and shapes

Functional design: Does not block lighting, sound, or visibility

Package Contents:

AISI 316 stainless steel protection net (custom or standard size)

Fixation kit in stainless or galvanized steel (depending on project)
