

## Standard Horizon CAT460 Antenna for HX370S Radio

The Standard Horizon CAT460 Antenna is specifically designed to ensure maximum performance and efficiency when paired with the HX370S radio, providing superior signal reception and transmission in the VHF frequency range. Built with high-quality materials and corrosion-resistant components, this antenna is ideal for maritime and industrial applications, ensuring long-term durability in harsh environments.

**COD EUROSUL:** 001207

**IMPA:** ---

**Part Number:** CAT460

**Approvals:** ---

## Specifications

### Features

**Compatibility:** Designed exclusively for the Standard Horizon HX370S radio

**Material:** Robust construction with corrosion-resistant components

**Performance:** Excellent VHF signal reception and transmission

**Resistance:** Protection against water, dust, and harsh environments

**Easy Installation:** Quick and secure connection with the HX370S radio

**Compact Design:** Ideal for portable use without compromising performance

### Applications

**Use:** Commercial and recreational vessels

**Operations:** Maritime, industrial, and port environments

**Communication:** Reliable in offshore and rescue scenarios

### Benefits

**Superior Performance:** Ensures high-quality signal for clear and stable transmissions

**Extreme Durability:** Resistant to harsh marine environments and corrosive conditions

**Ease of Use:** Simple and quick installation on the HX370S radio

**Portability:** Lightweight and compact design, perfect for daily use in critical operations

The **CAT460 Antenna** is the ideal choice for professionals using the HX370S radio, ensuring efficient communication and reliability in challenging environments.
