

Stearns Pill for Inflatable Vest Secumatic 3001s

The Stearns Pill for Inflatable Vest Secumatic 3001S is an essential spare component for the proper functioning of the automatic inflatable life jacket system. This reagent dissolves upon contact with water, activating the CO₂ cylinder release mechanism, ensuring instant inflation and safety in maritime emergencies.

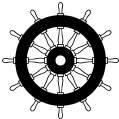

COD EUROSUL: 003026

IMPA: ---

Part Number: ---

Approvals:

SOLAS

Specifications

Features

- Automatic activation upon contact with water
- Compatible with Secumatic 3001S inflatable life jackets
- Controlled dissolution reagent, ensuring reliable activation
- Easy replacement for system rearming

Applications

- SOLAS/MED certified inflatable life jackets
- Maritime safety equipment on vessels and offshore platforms
- Essential replacement for inflatable life jacket maintenance kits

Benefits

- Ensures efficient and safe activation in emergencies
- Easy to store and transport
- Certified spare part, ensuring compliance with safety standards
