

Storz – 40a, 50a and 65a seal rubber ring

Storz sealing rings are essential components for Storz hose connections, ensuring effective sealing in firefighting systems. Made of high-resistance rubber, they prevent leaks and enhance the durability of connections.

COD EUROSUL: 005259

Specifications

Features

Storz sealing rings are made from high-strength rubber, ensuring greater durability and sealing efficiency. They are compatible with standard Storz connections and available in 40A, 50A, and 65A sizes.

Applications

These rings are widely used in firefighting systems, providing efficient sealing in hose and valve connections. They are also used in marine and offshore equipment, ensuring safety in vessels and offshore platforms. In addition, they are applicable in industrial and construction systems, sealing hydraulic and pneumatic couplings.

Benefits

Secure sealing: Minimizes leaks and improves operational efficiency

High durability: Strong material for long-term use

Wide compatibility: Suitable for marine, industrial, and offshore applications

Storz sealing rings meet the required standards for safety and performance in maritime and industrial emergency systems.
