

## Tiger-Stripped Polypropylene Rope – PP Mono 3-Strand – Multiple Sizes

The Tiger-Striped Polypropylene Monofilament 3-Strand Ropes are engineered for demanding marine, industrial, and cargo-handling applications. Featuring high tensile strength and low weight, these ropes are extremely durable, abrasion-resistant, and float on water. The striking yellow and black striped pattern enhances visibility in operational environments. Each roll measures 220 meters and comes in multiple diameters for different load requirements.

**COD EUROSUL:** 091222

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

### Benefits:

- High tensile strength for heavy-duty use
- Lightweight and buoyant – suitable for marine environments
- Excellent resistance to UV, moisture, and abrasion
- High-visibility color pattern for operational safety

### Applications:

- Marine Use: Mooring, anchoring, and rescue
- Industry and Construction: Load securing and material handling
- Maritime Zones: Offshore platforms, ports, and shipyards

### Technical Specifications:

Material: Polypropylene Monofilament

Structure: 3-Strand Twisted  
Color: Tiger-striped (Yellow and Black)  
Length: 220 meters per roll

**Measurements in inches:**

Eurosul Code	Diameter (mm)	Length (m)	Weight (kg)	Breaking Load (TON)	IMPA
091222	6	220	3,7	0,7	211301
091221	8	220	6,6	1,3	210251
091220	10	220	10	2	210253
091219	12	220	14,5	2,8	210254
095419	14	220	20	3,9	210255
095420	16	220	25	4,2	210256
