

TPA -I Type Bag Thermal Clothing – SOLAS/MED

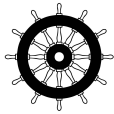

TPA-I thermal protection clothing is a certified salvage equipment according to solas and med standards, designed to preserve body heat in maritime emergency situations. Developed in Bag Type format, it is ideal for use on ferries and life boats, protecting the survivor against hypothermia, wind, rain and extreme cold.

COD EUROSUL: 000068

IMPA: 330175 - Thermal Protective Aid

Part Number: 330196

Approvals:

SOLAS

Specifications

Material: Aluminized polyethylene film

Fasteners: Front zipper and heat-sealed seams

Design: Bag-type format with sleeves and face opening

Dimensions: Approximately 2000 mm x 980 mm

Applications:

Life-saving equipment on vessels

Liferafts and rescue boats

Thermal protection in ship abandonment situations

Environments with prolonged exposure to cold

Benefits:

Readiness: Lightweight and compact product, ready for immediate use in emergencies

Durability: Water- and tear-resistant material, with integrity in up to 2 meters of water column

Safety: MED and SOLAS certifications ensure compliance with international requirements

Designed for use with a lifejacket, the TPA-I is an efficient and essential solution for thermal protection at sea.

Technical Specifications:

Material: Aluminized polyethylene film

Fasteners: Front zipper, heat-sealed seams

Dimensions: 2000 mm x 980 mm

Certifications: MEDB00005HT – DNV, in accordance with IMO Res. MSC.48(66), MSC.207(81), LSA Code
