

Depth Measuring Tape with Aluminum Body – Flat Plumb (30M)

The Depth Measuring Tape with Aluminum Body is a robust, high-precision solution for vertical measurement in tanks and industrial pipelines. Its aluminum construction provides excellent corrosion and wear resistance, making it ideal for harsh environments such as offshore, chemical, and mining facilities. Featuring a flat plumb for accurate readings, it is available in a 30-meter version, with or without Inmetro certification.

COD EUROSUL: 094911

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Material: High-resistance aluminum

Fixings: Fixed flat plumb for precise measurements

Design: Compact, ergonomic, with quick-retract crank

Availability: Models with and without Inmetro calibration

Applications

Depth measurement in industrial tanks and oil tankers

Wells and vertical pipeline inspection

Offshore and chemically exposed environments

Technical inspections and industrial maintenance

Benefits

Readiness: ready-to-use tool for field applications

Durability: aluminum body ensures long-lasting use in harsh environments

Safety: Inmetro-certified models provide reliable accuracy

Technical Specifications

Material: High-resistance aluminum

Fixings: Fixed flat plumb

Dimensions: Available in multiple lengths

Certification: With or without Inmetro calibration
