

Depth Measuring Tape with Plastic Body – Multiple Models

The Eurosul Depth Measuring Tape with plastic body is a reliable tool for vertical measurements in tanks, pipelines, and wells. Designed for industrial and marine environments, it can be equipped with different plumb types (flat or conical) depending on the application. Built from impact and chemical-resistant materials, it ensures accuracy and durability in demanding measurement tasks.

COD EUROSUL: ---

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Material: High-strength plastic body, resistant to impacts and chemicals

Fixings: Available with flat or conical plumb for different applications

Design: Lightweight, ergonomic, with quick-retract crank

Dimensions: Available in multiple lengths

Applications:

Liquid measurement in industrial tanks

Technical inspections in wells and vertical pipelines

Level monitoring in chemical and industrial facilities

Depth verification in civil construction

Benefits:

Readiness: Easy-to-use and ready for immediate operation

Durability: Robust plastic construction for continuous use

Versatility: Choice of flat or conical plumb for enhanced precision

Safety: Reliable design for accurate measurement in various conditions

Technical Specifications:**Material:** High-resistance plastic**Fixings:** Flat or conical plumb (depending on model)**Dimensions:** Multiple sizes available (upon request)**Certification:** Not specified
