

## Depth Measuring Tape with Plastic Body – Flat Plumb

The Depth Measuring Tape with Plastic Body is a durable and precise tool, ideal for use in tanks, vertical pipelines, and industrial environments. Built to withstand frequent use under demanding conditions, it features a flat plumb for enhanced stability and accuracy during measurements. Available in 15, 20, 30, and 50-meter versions, with or without Inmetro certification.

**COD EUROSUL:** ---

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

### Features

**Material:** High-resistance plastic body

**Fixings:** Fixed flat plumb for direct measurement

**Design:** Lightweight, ergonomic, with quick-retract crank

**Availability:** Multiple lengths, with or without Inmetro calibration

### Applications

Industrial liquid storage tanks

Vertical ducts and drainage systems

Mining wells and reservoirs

Technical inspections in construction

### Benefits

**Readiness:** ready-to-use tool for field applications

**Durability:** impact and chemical-resistant plastic body

**Safety:** Inmetro-certified versions ensure measurement reliability

### Technical Specifications

**Material:** High-resistance plastic

**Fixings:** Fixed flat plumb

**Dimensions:** Available in multiple lengths

**Certification:** With or without Inmetro calibration

Eurosul Code	Length	Certification	Description
092386	15M	Inmetro	15M tape – Inmetro calibrated
092388	20M	Inmetro	20M tape – Inmetro calibrated
