IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Material: Durable structure for intensive use

Fixings: Available with standard plumb or flat plumb

Design: Compact, practical, with manual rewind system

Dimensions: 20M and 30M

Applications

Tank and silo depth measurement

Well and vertical duct inspections

Level monitoring in industrial environments

Technical and maintenance operations

Benefits

Readiness: ready-to-use measuring tool with easy transport and operation

Durability: designed to withstand continuous use in industrial conditions

Safety: flat plumb versions provide higher measurement accuracy

Technical Specifications

Material: Industrial-grade durable structure

Fixings: Standard plumb and flat plumb (selected models)

Models

Eurosul Code	Model	Plumb Type	Length	Notes
095277	Depth Measuring Tape	Standard Plumb	20M	Industrial use
095278	Depth Measuring Tape	Standard Plumb	30M	Industrial use
095279	Depth Measuring Tape	Flat Plumb	30M	Higher accuracy
