

Hammar H20 ERU HM-0405 Electric Remote Unit – Red/Yellow

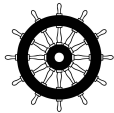

The Hammar H20 ERU HM-0405 Electrical Remote Unit is an advanced remote release solution designed to maximize safety and efficiency in the activation of lifeboats and other lifesaving devices. With both electrical and hydrostatic activation capabilities, this device is versatile and reliable in various emergency conditions, making it ideal for complex maritime installations.

COD EUROSUL: 003679

IMPA: 330119

Part Number: HM-0405

Approvals:

SOLAS

Specifications

Features

Activation: Combined electric and hydrostatic.

Release depth: 1.5 to 4.0 meters.

Breaking strength: 15 kN (reinforced white rope).

Weight: 0.3 kg.

Material: Stainless steel and anti-corrosion components.

Design: Versatile and without weak links, reducing failure points.

Applications

Remote release systems for lifeboats.

Commercial vessels, offshore platforms, cargo, and passenger ships.

Environments requiring synchronized control of multiple lifesaving devices.

Benefits

High reliability, without weak links and with activation by two distinct methods.

Emergency readiness, with precise automatic release under pressure.

Flexible, compatible with various mounting arrangements.

Simplified installation and minimal maintenance.

Package Contents

01 Hammar H20 ERU HM-0405 unit.

Technical manual and identification tag.
