

## Union of Machino Fast Fire Hose – 40a, 50a and 65a

The Machino Quick Coupling Hose Connection is designed for secure and efficient connections in firefighting systems. Made of high-strength brass, it ensures durability, corrosion resistance, and reliable sealing for marine, industrial, and offshore applications.

**COD EUROSUL:** 091161

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

**The Machino Male Adapter** allows quick and secure connections between hoses and firefighting systems, being widely used by firefighters, industries, and vessels.

### Benefits

**Quick coupling:** Facilitates agile and secure connections in emergencies

**High resistance:** Made of forged brass for maximum durability

**Efficient sealing:** Prevents leaks and ensures system integrity

**Wide compatibility:** Compatible with standard Machino hoses

### Applications

**Firefighting systems:** Used on ships, offshore platforms, and industrial facilities

**Industrial safety:** Quick and secure connections for firefighting equipment

**Marine use:** High resistance to corrosive environments

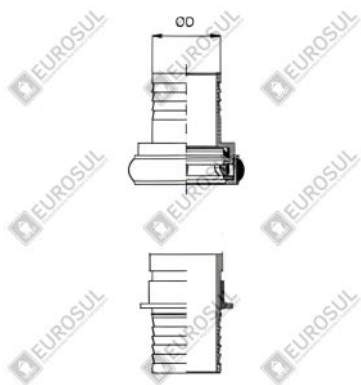

### Technical Specifications

The Machino adapter is available in sizes 40A (1.1/2”), 50A (2”), and 65A (2.1/2”). Manufactured in brass, it offers excellent performance in high-pressure and harsh environments

**Material:** High-resistance brass

**Compatibility:** Standard Machino hoses

**Resistance:** High durability and reliable sealing
