

VHF Antenna for Tron TR20 and TR30 Radios with Hand Strap

The Jotron VHF Antenna PN 102918 is an essential accessory for Tron TR20 and TR30 portable radios, designed to provide clear and stable communication in maritime and offshore environments. Made from reinforced polymer resistant to corrosion, this antenna ensures long-term durability even under harsh conditions, such as saltwater exposure, dust, and vibrations.

COD EUROSUL:	004081
IMPA:	---
Part Number:	TR20/TR30
Approvals:	---

Specifications

Features

Material: Reinforced polymer, resistant to corrosion and harsh marine conditions

Compatibility: Designed for Jotron Tron TR20 and TR30 radios

Design: Robust antenna with excellent VHF transmission and reception performance

Hand Strap: Integrated safety strap for easy carrying and reduced risk of dropping

Applications

Commercial and Fishing Vessels: Reliable communication at sea

Offshore Platforms: Continuous operations in demanding environments

Emergency Communication: For use with GMDSS portable radios in critical situations

Benefits

Readiness: Provides fast and efficient communication during emergencies

Durability: Built with materials resistant to seawater, corrosion, and harsh weather

Safety: Integrated hand strap prevents accidental drops and ensures easy access

The **Jotron PN 102918 Antenna** is an essential accessory to maximize the performance of Tron TR20 and TR30 radios, ensuring reliable maritime communications. It includes a practical hand strap for enhanced safety and ease of handling in emergency situations.
