

## VHF CAT20 Spare Antenna for Entel HT649 / HT Series Radios

The VHF CAT20 antenna is a replacement antenna compatible with Entel HT649 and all radios in the HT series. It replaces the original CAT40 antenna and preserves full VHF performance, ensuring clear and stable communication. Ideal for marine, nautical, industrial, or onboard vessel use, it guarantees that the radio maintains range and reliability for both routine communication and emergencies. Installation is straightforward: remove the old antenna and install the CAT20. Built with weather- and corrosion-resistant materials, the antenna is suitable for maritime environments, saltwater exposure, and open-sea conditions.
