

## Waterproof ID Tube/Container for Inflatable Rafts

This Waterproof ID Tube/Container is essential for maritime safety, designed to securely and accessibly store the identification information of the shipowner and the vessel associated with the inflatable raft. Its waterproof structure ensures protection under the most adverse marine conditions.

**COD EUROSUL:** 004672

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

### Features

**Seal:** fully waterproof, protecting contents even under immersion.

**Material:** corrosion- and wear-resistant composite.

**Design:** lightweight and easy-access for emergencies.

### Benefits

**Protection:** keeps identification data safe and dry.

**Durability:** robust build for long-term use.

**Practicality:** quick handling and simple operation.

### Applications

**Maritime safety:** ideal for liferafts and vessels.

**Compliance:** meets identification and safety standards.

### Technical Specifications

**Material:** anticorrosive composite.

**Property:** waterproof.

**Use:** vessel identification storage.

**Environment:** resistant to salt and weather.
